Steps

1. user enters the grad connect page and opts to create an account
2. user enters information and creates a new account and enters the main page
3. user finds a topic that interest them and clicks on it to view the room
4. After reading the conversations they proceed back to the home page
5. on the homepage they see a user that they know and decide to connect with them
6. The user sees the option to direct message them and decides to reach out
7. After chatting back and forth the user views their profile page
8. on the profile page, the user can see things such as the settings and the friends they have added
